

Inter-Tel® CommSource® Audio and Videoconferencing

One source for all your communications needs

Success in today's highly competitive business climate demands cutting edge communications resources. What better way to connect, collaborate and interact more effectively with your business partners and vendors than with videoconferencing and audioconferencing capabilities.

Inter-Tel CommSource is your one-stop shop, offering your enterprise a powerful portfolio of conferencing products and services that bring increased productivity and efficiency to businesses of all sizes.

We work for your business

Inter-Tel redefines the communications landscape, delivering technologically advanced voice communications for the small and mid-sized enterprise. This focused commitment, along with Inter-Tel's consistent financial strength and industry-defying growth, enables us to provide our business customers with the right solutions for their needs – today and tomorrow.

Inter-Tel is steadfast in building its customers by intelligently identifying and addressing our business customers' needs, while seeking out new solutions, resources and alliances that empower our customers to improve their productivity and profitability.

Our Managed Services initiative brings together the core of Inter-Tel: The finest products and the pride of our people in bringing them to you in the most effective, efficient way. Inter-Tel can design, install, train and support the complete integration of telecommunications networks for your business. From setting up hardware to laying cable, Inter-Tel has the expertise to make telecommunication and data equipment run and "talk" to each other – custom designed to meet your business needs.

Alliances with leading manufacturers: Quality at competitive prices

At Inter-Tel we partner with leading manufacturers who have earned the Inter-Tel Quality First designation – offering the latest technology and highest quality products, designed to integrate with Inter-Tel's diverse product line. Inter-Tel and its authorized providers offer you complete communication solutions at competitive prices.

Inter-Tel® CommSource® Audio and Videoconferencing

Audioconferencing

ClearOne® Communications

Wireless Freedom and Wired Expandability

ClearOne Tabletop Conferencing Phones eliminate many of the common distractions you've come to expect in conference calls. Between the Max Wireless and the Max EX, there's an ideal solution for every space. Both designs are easy to transport and configure, and cost a fraction of what you might expect. Max Wireless lets you easily convert any office within 150 feet of the base station into a conference room without wires on the table or the floor. Max EX expands to fit larger rooms by linking up to four phone units complete with microphones, loudspeakers and controls for an even distribution of sound.

Max Wireless

Forum Communications International

Products that meet your teleconferencing needs now and into the future with reliability, flexibility, expandability and low-cost built in

Founded in 1991, Forum Communications is the leading provider of conference bridges for business, government, education and public service markets. They manufacture and market two lines of conference bridges – the Confer™ III ECS and the Consortium™.

When you want the most reliable, easy-to-use and cost-effective teleconferencing bridges available today, designed with the user in mind, Forum Communications is the choice to make. Inter-Tel's line of products and services complement the teleconferencing systems designed by Forum Communications to deliver dependable communications in today's business world.

Confer III ECS Series provides a low-cost, easy-to-install, easy-to-use audio conferencing bridge. Preferred by business, government and educational organizations, the systems feature a "Meet Me" capability. The Confer III ECS hosts 8-72 ports plus additional features. ECS is Emergency Collaboration System for Defense, Public Safety and Corporate Security applications.

Consortium is a comprehensive conference system that helps businesses overcome the limitations of time and distance to reach people in multiple locations quickly. The system is Windows NT based and connects to the corporate LAN and utilizes a T1 digital interface to PBX. Easy to install and intuitive to use, this highly sophisticated system features 24-96 ports, and beyond.

Videoconferencing

TANDBERG®

Worldwide inter-operability at competitive pricing

A leading global provider of collaborative communication solutions, TANDBERG designs, develops and manufactures videoconferencing systems and video management software, and specializes in standards-based videoconferencing systems that provide worldwide inter-operability at a competitive price.

Combined with TANDBERG's belief that the success of any videoconferencing solution depends upon high quality, reliable and

easy-to-use products and services, you can be assured of excellent value. TANDBERG offers videoconferencing solutions showcased here and more, which include highly advanced presentation, multi-site and transcoding capabilities available in their product offerings.

TANDBERG and Inter-Tel's videoconferencing solutions provide you and your company with the benefit of seamless systems integration coupled with high distinctions from the industry as reliable service providers.

TANDBERG 6000

Perfect for large meeting rooms and boardrooms, the TANDBERG 6000 features an exciting and intuitive user interface and remote control, creating a collaborative and effective meeting environment. This sleek single stand rollabout accommodates two 32"/33" monitors, yet is easily maneuvered by just one person.

TANDBERG 1000

This integrated videoconferencing system is ideal for small meeting rooms and executive offices. The TANDBERG 1000 is totally self-contained, offering two fully integrated, space saving alternatives in one; a freestanding tabletop system or a state-of-the-art wall mounted solution.

TANDBERG 880

Specially developed for medium to small meeting rooms, the TANDBERG 880 incorporates all components into one lightweight and portable set-top unit, offering a high degree of flexibility to the user. This elegant set-top product can be used with any standard television set.

Videoconferencing Accessories – Equip your conferencing environment with the right communication tools

Inter-Tel CommSource offers a fully-integrated suite of audio and videoconferencing products, services, furniture and accessories – a comprehensive conferencing solution.

When evaluating applications, Inter-Tel CommSource takes into account the many possible settings where conference products are used, and consider acoustics, ergonomics, room layout and existing infrastructure, as well as specific applications and the communications objectives of using conference tools.

Video Products

Document cameras, cart/monitor bundles, projectors and custom configuration peripherals are included in this category. A document camera is an exciting desktop color camera for presenting or importing documents quickly, easily and at high resolution quality. The DocCam Pro™ is the first integrated presentation tool designed for a variety of collaborative applications from the classroom to the boardroom. A rotating camera head and telescoping neck maximize convenience and usability. Stereo microphones with line-level outputs, and S-video and composite video connections provide for easy integration with other video appliances, i.e. cameras, scan converters and VCRs.

DocCam Pro

Conferencing Furniture

A complete line helps create the optimal conferencing environment, making your equipment easy to access and use, as well as providing mobility. Inter-Tel CommSource offers specialty furniture to solidify your conferencing experience by offering carts or custom tables specifically suited to meet your videoconferencing needs. The solutions come in a variety of finishes and sizes.

Conferencing technology serving for today, providing for tomorrow

Today's business communication needs demand anytime, anywhere connectivity pushing the limits of collaboration well beyond company walls. The desire to create a virtual conference room utilizing seamless video, audio and mobility tools is a key driver to achieving operational success.

Inter-Tel, in alliance with manufacturers, is committed to ensuring your overall communications investment and prepared to help you identify the best options for achieving your business productivity and efficiency goals.

WHERE TO BUY?
