

Inter-Tel® 3000 Users Tell It Like It Is

Companion Pet Clinic

"We've got about four different areas that we need to be able to send phone calls to, as well as page individuals in those areas. We installed the Inter-Tel 3000 system four to six months ago, and we haven't looked back. In our business, where we're receiving phone calls all day long, because we're a walk-in clinic, it's important for our clients to be able to reach us. The phones are much easier to use; a lot more user friendly as a system, almost intuitive to what we're looking for."

Dr. Reed Prince

Companion Pet Clinic

Front Range Surgical Services

"We are a surgical office, so it was important to have multiple lines, roll calls to answering services seamlessly, manage conference calls with a quality speaker phone and a cordless unit for mobility around the office. It was an easy, easy pick when it came to Inter-Tel. Inter-Tel 3000 is a very simple platform. We installed it four months ago and it's performed great! The nice thing about the system is that it's expandable, you can go analog or digital, you can do multi-lines, you can go cordless; it's endless."

Greg Levin

Chief Operations Officer, Front Range Surgical Services

Gilbert Boys & Girls Club

"Inter-Tel 3000 has really helped us out a whole a lot. Instead of having to write messages down, we have the option of transferring to the individual's voicemail box. Compared with the old system, when there were incoming phone calls, individuals would get a busy signal and would not be able to leave a message. With this new system, when an individual calls and the phones we have are in use, they are forwarded to voicemail. It's really a great help to our front office."

Stephanie Zaragoza

Office Manager, Gilbert Boys and Girls Club

Inter-Tel® 3000: The Ideal Communications Solution for Business and Residential Applications
